

The technical data at a glance:

Vacuum sweeper		Hako-Jonas 900 V	Hako-Jonas 900 E
Drive type:		B&S petrol engine	battery driven
Total capacity:	kW	4,9	1,65
Sweeping width:	mm	700 without side brush, 950 with 1 side brush, 1200 with 2 side brushes	
Area performance:	m ²	4200 without side brush	4200 without side brush
(max. theoretical area	m ²	5700 with 1 side brush	5700 with 1 side brush
performance):	m ²	7200 with 2 side brushes	7200 with 2 side brushes
Sweeping speed up to:	km/h	6	6
Length with side brush:	mm	1500	1500
Width:	mm	1000	1000
Overall height:	mm	1330	1330
Weight, ready for operation:	kg	350	
With drive batteries:	kg	kg	440

The Hako-Jonas 900 offers the highest product quality and long machine life as a result of modern manufacturing processes and a strict quality assurance system. The Hako-Jonas has been manufactured in accordance with the necessary CE guidelines (CE conformity) and fulfils the European Norms EN 60 204 and EN 60 335.

In the interest of technical progress we reserve the right to alter equipment without prior notice.

Hako is the right partner:

Cleanliness with safety
Hako machines adhere to strict quality regulations/standards. Quality made by Hako. We also take care of what we sell – world-wide.

Sales, hire, leasing, rental
Hako allows you to individually plan capital investments depending upon customer's demands and the available means.

We are there for you day and night
Reliable after-sales service and excellent logistics guarantee that machines can be ready for operation around the clock.

Hako is never far away
The efficient Hako sales and service network means that Hako is always close at hand.

Clean ahead

Superior technology
for industrial cleaning

Ride-on vacuum sweeper Hako-Jonas 900

NEW!

Dust-free sweeping. Extremely economical. Whilst comfortably seated. Up to 7.200 m² cleanliness/hour. Indoors and outdoors.

**Hako –
perfect from
product
to service.**

Compact ride-on vacuum

The advantages at a glance:

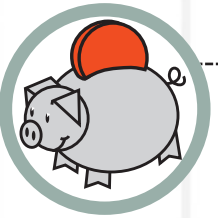

Point 1

Perfect sweeping result thanks to a new large size main broom and powerful, efficient vacuum blower.

Point 2

Extreme manoeuvrability as a result of the direct steered front wheel drive. A machine which is a real pleasure to drive and still fun, even in narrow aisles.

Point 3

Excellent price/performance ratio. Extremely low machines life costs as the result of an optimum price and solid construction.

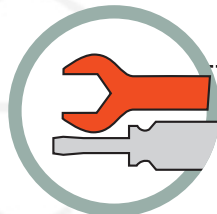

Point 4

Modern, ergonomically optimised work place for fatigue-free operation. Minimum training required thanks to self-explanatory, operator-friendly handling.

Point 5

Finance alternatives to suit your requirements: purchase, hire, leasing, rental, full service.

Point 6

Simply a work of genius: service-friendly and robust. Avoids causes of faults by concentrating on what's important.

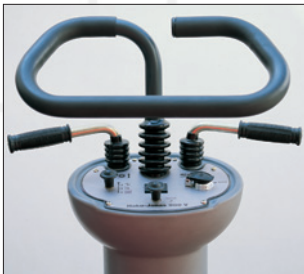

Hako-Jonas 900 V: For outdoor applications with hydrostatic drive and rpm regulated petrol engine.

Hako-Jonas 900 E: For exhaust-free indoor applications with electric drive and various types of battery systems.

sweeper Hako-Jonas 900

Well thought-out construction:

Handy operating panel

All operational elements and warning lights/displays are within direct view and easy reach of the operator.

Central on/off switch combined with the main broom left is effected via a positional lever which is easy to operate.

Adjustable driver's seat for fatigue-free work.

Optimum view of the area to be cleaned.

Second side brush left hand side – available as an option.

Robust main broom system

The newly designed large main broom can be changed without tools and comes with protection against debris wrapping itself around the broom and patented pick-up.

Powerful, efficient filter system

The 3 m² plate filter package is integrated in the blower housing and is easily accessible. The long intervals between cleaning are achieved via an electric shaker system. The degree of separation amounts to >99%.

Handy Transport holder for manual sweeping brush

Direct access. The clearly laid out engine compartment is directly accessible for maintenance and servicing purposes via the seating console

Central sweeping level adjustment, without tools

This guarantees the right level and even pressure of the free floating, suspended main broom.

The waste disposal concept "take it easy"

At any time checks can be made on the level of debris or bulky rubbish can be placed in the hoppers via the central lever on the upper lift. ① The two 30 litre hopper can be removed without getting your hands dirty ② and can be emptied easily by one person. ③

Safe and steady to drive

By removing your foot from the drive pedal the Hako-Jonas slows down by itself even when negotiating inclines.
